BETTY SHEFFIELD SUPREME

Lovely New Camellia

BETTY SHEFFIELD SUPREME

Made Tremendous Hit

Many visitors were thrilled to see plants in bloom here last winter. Plants were shipped to places as distant as Seattle, Los Angeles, Houston and Norfolk, and to Australia.

So many said the flower is much better than the photograph. Color pictures are pretty, but always the flower is more lovely.

LOCATION, INVITATION, GUARANTEE, ETC. . . .

Location. Office, trial grounds and sales yard at city limits, east, at 1842 Smith Avenue. Leaving city limits, Smith Avenue becomes Boston Road and is a link of U. S. Highway 84.

Invitation to Visitors. Visitors are welcome at our nursery every day in the year, and there is no obligation to purchase. See Roses in the large Test Garden of Sam Hjort at 1840 Smith Ave., adjoining main nursery, April through October; Daylilies April through summer, and Camellias November through March. Flowering Trees, including a fine collection of Oriental Magnolias, are an added attraction.

Substitution. Usually we can fill order complete with first-choice varieties. But as the season advances, when a variety is sold out we will substitute one of equal or greater value, unless instructed not to do so.

Prices in this catalog cancel all previous quotations and are effective until a new catalog or price list is issued.

Minimum Order for us to prepay Roses, Daylilies and Liriope, \$3.50. Orders of less, please add 50c for postage and handling.

Guarantee. We guarantee all plants to be true to name, up to grade, properly dug and packed, and shipped according to instructions. Most people who pay their good money for plants set them carefully and tend them properly. Instructions for planting and care accompany every shipment. We do not make a blanket guarantee that our plants will live, but we will adjust satisfactorily any reasonable claim, provided losses are not from weather or other conditions beyond our control, and your claim is filed by July 1.

Visitors Please Note

We wish to serve everyone in turn and sometimes many cars are at the nursery at one time. In order that salesmen may know who is "next," please give your name at the office upon arrival. The ladies in the office will then see that you are served in turn and as quickly as possible consistent with adequate and courteous attention to all.

Foreword . . .

Four of the finest Roses of all time are the new All-America Winners for 1962, Christian Dior, King's Ransom, John S. Armstrong and Golden Slippers. The colors are excellent, the bushes strong in growth. It isn't often that we go into ecstasies over new things. We have the utmost respect and admiration for the best of the old, and the old stays only through merit. But, these new Roses deserve all that we say of them in this catalog.

Camellias have become an increasingly important specialty with us, too. Last season it was our privilege to introduce the most unique and unusual Camellia seen in a long time, and one of the loveliest, Betty Sheffield Supreme. We have propagated all we could of this variety and are still the only source of plants set with flower buds. We have many other fine Camellias this season, some of the newest in limited supply but very good plants.

Roses in the fields look wonderful and Camellias and other plants at the main nursery are at their best, thanks to another excellent growing season. We hope as many as can do so will call at the nursery for plants, but to those who order by mail we promise to make careful selections, pack well and ship promptly.

Last winter we had more visitors come by to see Camellias in bloom in the greenhouse and outside than ever, and the same is true of visitors to our large Rose Test Garden the past spring and summer. There is yet time to see a great upsurge of fall rose bloom. The Old Fashioned Tea Roses are in their glory in the fall. Actually, all Roses seem to be at their best in those final weeks before cold weather comes. We hope you will come by and enjoy Roses with the Hjorts, and come back again when Camellias fill out those winter months that complete a year of bloom.

HJORT'S

Fine New

CAMELLIAS

Thomasville is in perhaps the most favored locality for producing the finest Camellia blooms in America. Visitors have told us the finest quality of bloom they have seen is in the area of which Thomasville is the center—Albany, Cairo, Tallahassee, Quitman. Here we have conditions of climate and soil most favorable to growing quality plants, too.

Naturally, as an established and progressive nursery interested in the most distinctive flowering plants for this area, we have long been interested in Camellias. We are always procuring new varieties from other parts of the Camellia belt. And we have produced or distributed for other originators here, a goodly number of new varieties.

BONNIE MARIE

All-America Winner for 1961

A large and handsome hybrid Camellia

Fine CAMELLIAS are a Specialty with us

With the coming of so much that is delightfully new in color and form, and the discovery that the bush is not exotic and temperamental, the Camellia has come to be the favorite flower of many gardeners in the Lower South, where it is an exciting and distinctive gem. It has been a happy discovery to see that when properly planted and cared for, but not pampered, the Camellia is an attractive evergreen bush to grace any setting, and with an advantage over other shrubs that hold their foliage in that it is radiant with bloom in all but the very coldest days from October to March.

The growing of quality Camellias has long been a specialty with us. We raise many of these in the fields, in full sun, thereby making the stockiest and hardiest bushes. For the past several years we have made it a practice to put most of the salable plants in containers, to facilitate easy and safe transplanting at any time. We are testing new Camellias all the time, and our listing of miscellaneous varieties shows many that are just beginning to get into circulation.

Visitors are always welcome here, whether to buy or just to see what is in bloom and what is new. On the grounds of the main nursery, around our office and in woodlands, are many, many varieties to see, in sizes all the way from small plants in the newer varieties to very large plants in some of the best of the older varieties.

In our greenhouses will be seen many varieties growing under ideal conditions to develop the maximum quality of bloom regardless of any severe cold. Last winter many visitors came to see the original stock plants of Betty Sheffield Supreme. There were flowers of almost breath-taking beauty, and many other varieties blooming at their best.

We wish we could describe many varieties that for lack of space we can name only. In many of the newer ones the supply is very limited, and we urge ordering early. Mail orders will be given careful handling and all plants securely crated for safe delivery. But we do urge everyone who can, to visit the nursery and see these Camellias.

ANN SMITH

Dark red. Worthy companion
of the Sheffields

Betty Sheffield Supreme

The very lovely Camellia with picotee edging

The most unique and fascinating new Camellia of the past decade! Added to the attractive semi-double form and pure white color is the strikingly different feature of picotee edging—a narrow border of deep pink, often red, on the margin of practically every petal. Picotee pattern has been seen in such flowers as gloxinias, phlox, etc., but this is the first time it has appeared in an evergreen shrub—and of all plants, a Camellia!

Betty Sheffield Supreme has the same qualities of growth, flowering and hardiness as the other Sheffields. We distributed many plants last winter, and naturally 1-year grafts will be offered from various sources. We are still the only source of plants with flower buds, and have a fine lot of 2-year and 3-year grafts that are above the average in quality.

Since our propagations are from proven plants with the best picotee edging, we again guarantee all our Betty Sheffield Supreme plants to bloom all or mostly true. Many people came by last season to see this lovely Camellia in bloom in the greenhouse and on original stock plants growing at our office grounds and adjacent woodland. We want you to come again, but in the meantime if you wish a good budded plant, please let us reserve it now.

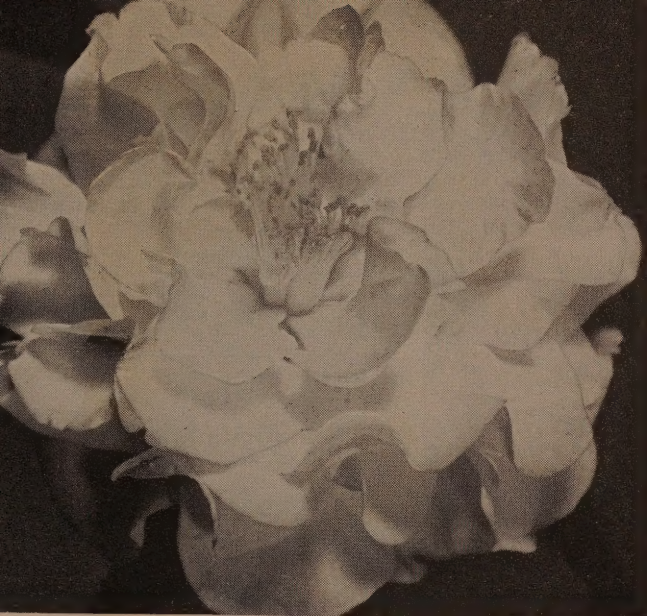

Prices of Betty Sheffield Supreme

- 3-yr. grafts, first size, \$75.00.
- 3-yr. grafts, second size, \$60.00.
- 2-yr. grafts, first size, \$50.00.
- 2-yr. grafts, second size, \$35.00.
- 1-yr. grafts, first size \$25.00.
- 1-yr. grafts, second size, \$15.00 to \$20.00.

All in Containers. Fine quality.

All the Sheffields are lovely.

POPULAR *Camellias* At Popular Prices

Vigorous plants, own-root, mostly well branched, many set with flower buds. Grown in good peat and sand mixture, no hard balls of soil. All in containers, mostly with loose bottoms, for safe transplanting almost the year round.

The growing of fine Camellias has come to be a great specialty with us. Catalog space does not permit describing many varieties, new and comparatively new, and we welcome inquiries.

Varieties in 2-gallon cans at \$3.50 each

Adolphe Audusson Special, Ann Smith, Betty Sheffield Blush, Betty Sheffield Pink, Betty Sheffield Variegated, Dr. Knapp, Dr. Tinsley, King's Ransom, Marie Bracey, Mattie O'Reilly, Pink Champagne, Sally Harrell, Ward's Daikagura.

Minimum shipping order of 2-gallon Camellias, two plants.

Varieties in 2-gallon cans at \$2.50 each

Alba Plena, Arajishi, Aunt Jettie, Beatrix Hoyt, Betty Sheffield, Bryan Wright, C. M. Wilson, Daikagura, Daikagura Variegated, Debutante, Elegans (Chandler), Emily Wilson, Flowerwood, Frosty Morn, Gigantea, Herme, Magnoliaflora, Marjorie Magnificent, Mathotiana Rubra, Mathotiana Supreme, Mrs. Charles Cobb, Mrs. Lyman Clarke, Nina Avery, Pearl Maxwell, Pink Perfection, Rosea Superba, Sally Harrell, Simeon, Starlet, Tomorrow, Wildwood. Sasanquas Apple Blossom, Beni Kantsubaki, Daydream, Hinodegumo, Jean May, Oleifera, Papaver, Pink Snow, Rosea, Setsugekka, Snow-on-the-Mountain.

Minimum shipping order of 2-gallon Camellias, two plants.

Varieties in 1-gallon cans at \$2.50 each

Ann Smith, Betty Sheffield Blush, Betty Sheffield Pink, Betty Sheffield Variegated, Dr. Knapp, Dr. Tinsley, King's Ransom, Marie Bracey, Mattie O'Reilly, Pink Champagne, Ward's Daikagura, Woodville Red.

Minimum shipping order for 1-gallon Camellias, four plants.

Varieties in 1-gallon cans at \$1.50 each

Alba Plena, Angel's Blush, Aunt Jettie, Beatrix Hoyt, Betty Sheffield, Bryan Wright, C. M. Wilson, Daikagura, Debutante, Elegans (Chandler), Emily Wilson, Flowerwood, Frosty Morn, Gigantea, Gov. Mouton, Herme, Magnoliaflora, Marjorie Magnificent, Mathotiana Rubra, Mathotiana Supreme, Mrs. Charles Cobb, Mrs. Lyman Clarke, Pink Perfection, Pride of Descanso, Prof. C. S. Sargent, Rosea Superba, Sally Harrell, Simeon, Starlet, Tomorrow and others. Sasanquas Apple Blossom, Beni Kantsubaki, Daydream, Hinodegumo, Jean May, Oleifera, Papaver, Pink Snow, Rosea, Setsugekka, Showa-no-Sakae, Snow-on-the-Mountain and others.

Minimum shipping order for 1-gallon Camellias, four plants.

Varieties in 5-gallon egg cans

Betty Sheffield, \$6.00; Mrs. Lyman Clarke, \$6.00; Sparkling Burgundy, \$7.50; Tomorrow, \$6.00; Sally Harrell, \$6.00.

Please add \$1.00 per plant for crating egg can size, 50c per plant for crating 2-gallon and 1-gallon sizes. All Camellias shipped express collect.

THOMASVILLE, GEORGIA

Camellia Scions

We sell scions of all Camellias we have, except patented varieties. There are many choice ones, old and new. Scions are cut from vigorous stock plants. Ask for price list.

KING'S RANSOM All-America Winner for 1961

PRICES OF CAMELLIAS Except as noted

Grafted Plants, Field Grown, Many in Cans

1-yr. grafts on 4 to 6-yr. stocks, B&B, \$5.00 to \$7.50

2-yr. grafts on 6 to 7-yr. stocks, B&B, \$10.00 to \$15.00

Crating charge for shipping, \$1.00 per plant extra

All prices are f.o.b. Thomasville, Ga.

Aaron's Ruby. Bright red, very large, semi-double to anemone form. While vigorous, it is usually of slender, somewhat pendulous growth, but our field-grown plants are above the average for sturdiness.

Adolphe Audusson. Generally considered the finest semi-double, dark red Camellia in which stamens are one compact ring in center of bloom. Heavy, dark green foliage.

Adolphe Audusson Special. Loveliest variegated form of Adolphe Audusson. Our plants are grafted from scions especially selected for having a predominance of white. Many blooms show waves of marbling.

Alba Plena. Still the acme of perfection in double-flowering Camellias. Many double white Camellias have been created, but none of such form as to equal Alba Plena. Pure paper-white.

Angel. White; large semi-double with fluted petals. Compact, vigorous growth.

Ann Smith. One of the very finest of deep red, semi-double Camellias. Very uniform, compact, somewhat rounded growth, with attractive large, dark green foliage. Flowers are large, frequently more than 5 inches across, of glowing deep red. Blooms along with the Sheffields, and like them, is very hardy. For a large-flowered variety, is a very free bloomer. No finer deep red has come along in many years.

Angel's Blush. A very lovely miniature. Very small, semi-double, light pink, having the appearance of a tiny Pink Perfection.

Barney Diamond. Clear pink. Very large, semi-double with large, wavy, notched outer petals and intermixed crinkled and twisted petaloids and scattered stamens. Vigorous, open growth. 2-yr. grafts, \$15.00; 1-yr. grafts, \$7.50 to \$10.00.

Betty Sheffield. This charming Camellia, raised as a seedling by Mrs. A. B. Sheffield of Quitman and introduced by us a few years ago, has become one of America's leading varieties, being greatly prized from Norfolk to Texas, and on the Pacific Coast. Large, often 6-inch, very regular semi-double to loose peony form, white with occasional red or pink splotch or stripe. Petals slightly waved; golden stamens interspersed among petals. The bush is a strong, vigorous grower, upright and compact, and the foliage is large and distinctive. Superior to many others of similar color.

Betty Sheffield Blush. A large and lovely sport of Betty Sheffield. Light pink; some flowers have deeper splotches, all have white edge. All are exquisite. Like its parent, this Camellia begins blooming in November and continues to March. The habit is compact and shapely, the foliage large, dark green. An occasional bloom measures 6 inches across. Winner of top awards

in many flower shows.

Betty Sheffield Pink. From the various deep pink sports of Betty Sheffield we have selected the best rose-pink. Bloom and bush have all the good characteristics of the parent. Better than most semi-double pink Camellias.

Betty Sheffield Variegated. Where the original Betty was white with occasional pink stripes or splotches, this one reverses the color combination, being deep pink, with white markings. More and more people have come to like this choice variety very much.

Bonnie Marie. Plant Patent 1801. All-America Winner for 1961. A strikingly beautiful hybrid Camellia bearing large, semi-double blooms freely over a long season that begins in January. The large, wide petals are a clear light pink; short golden stamens in center and interspersed among petals. Bonnie Marie is quite a superior hybrid, with larger flowers than most of its class.

Caroline Browne. Red. Large peony form with loose petals. Vigorous, spreading growth. Mid-season to late bloomer.

Cecile Brunazzi. Light pink. Large, semi-double to peony form with large outer petals and creped, twisted, upright center petals interspersed with stamens. Midseason.

Clarise Carlton. Bright red. Very large, semi-double. Vigorous, upright growth. This comparatively new and fine Camellia is a valuable addition for any good garden.

Camellias At Popular Prices

- C. M. Wilson.** Sport of Elegans (Chandler), and exactly like parent except that it is a clear, even shade of light pink.
- Coral Pink Lotus.** Large and showy semi-double coral pink with deeper pink veins. Very fine. 1-yr. grafts.
- Coronation.** White. Very large, semi-double. Vigorous, open, spreading growth. 1-yr. grafts, \$10.00.
- Country Doctor.** Deep metallic pink with deeper pink veins. Very large, semi-double, with creped petals and curled, upright inner petals. Vigorous, upright growth.
- Daikagura.** Long the standard extra-early Camellia of the South. Often in bloom before end of September at Thomasville, continuing to early winter. Available in solid deep pink, and in variegated. 1-gal. and 2-gal. only.
- Daikagura, Ward's Variegated.** A very showy Daikagura with most white petals; very select.
- Drama Girl.** One of the great Camellias of all time. Very large, semi-double, deep salmon-pink. Vigorous growth and very large, dark green foliage. 2-yr. grafts and 1-yr. grafts.
- Drama Girl Variegated.** Our selection of this large and lovely Camellia is from one bush producing flowers with fully 50 per cent white. Foliage and growth like the original Drama Girl. 1-yr. grafts, \$10.00.
- Dr. Knapp.** The extra-large, deeply serrated, dark green leaves make this Camellia outstanding, although the deep red flowers are fairly good. 1-yr. grafts only.
- Dr. Tinsley.** Very light pink at base, shading to deeper pink; semi-double. Truly one of the loveliest of all Camellias. \$2.50 to \$7.50.
- Emily Wilson.** A delightful light pink Camellia. Large; semi-double to loose peony form with mixed petaloids. Vigorous; compact, upright in growth.
- Eugenia Howell.** A very showy Mathotiana sport. Deep pink to red, often splotched and flecked white. Very large, peony form, with intermixed petaloids and stamens.
- Florence Stratton.** White with some petals pink. Large, formal to rose-form double with cupped inner petals. Vigorous, bushy growth.
- Flowerwood.** A distinctive sport of Mathotiana Rubra, with flower petals fimbriated. 2-gallon cans only.
- Frank Eidson.** Extremely early, flowers right along with the Daikaguras. Large peony form, white with few pink streaks. Bush upright and vigorous in growth. 2-gallon cans only.
- Frank Gibson.** A most distinctive Camellia, different from all others. Pure white, anemone form, with a large mass of golden-edge petaloids in center. The most yellow of any Camellia to date. Vigorous bush; profuse bloomer.
- Frosty Morn.** A very large white anemone to peony form with beautiful long, narrow, slightly twisted foliage. Medium, open, upright growth. Very good.
- Guest of Honor.** Salmon-pink. Large, semi-double to peony form. Vigorous, compact, upright growth. 2-yr. grafts and 1-yr. grafts.
- Gulio Nuccio.** A very large Camellia of unusual beauty. Semi-double, coral-rose, with 12 to 15 wavy petals and 3 to 5 large rabbit ears. Vigorous growth, dark green foliage. 2-yr. grafts, \$12.50 to \$15.00; 1-yr. grafts, \$5.00 to \$10.00.
- Gulio Nuccio Variegated.** Our propagations of this fine variegated flower were made from one plant showing more than 50 per cent white in blooms. 1-yr. grafts, \$10.00.
- High Hat.** Very lovely light pink sport of Daikagura, with all the good qualities of the parent.
- Hishi-Kairito.** Clear pink miniature; semi-double with mixed petaloids and stamens.
- Indian Summer Variegated.** One of the best of the many Daikagura seedlings. Peony form. Lighter shade of pink than most of its class. 1-yr. grafts.
- Joshua Youtz (White Daikagura).** One of the largest pure white Camellias. Blooms very early and continues far into the season.
- Juanita Smith.** Described by those who have seen it as an improved Dr. Tinsley. Introduced last season and a favorite at some of the shows. 1-yr. grafts, \$10.00.
- Kate Smith.** An unusual Mathotiana sport. Bright red, shading to light lavender, sometimes variegated white. Was best flower in Atlanta show last season. Our stock is direct from the originator. 2-yr. grafts, \$15.00, 1-yr. grafts, \$7.50 to \$10.00.
- King's Ransom.** Plant Patent 1800. All-America Winner for 1961. A fascinating light pink flower, turning slightly darker as it ages. Semi-double form, midseason blooming. The bush is a fast grower, upright and compact and very cold-hardy. One of the best new Camellias to appear in recent years. All sizes available.
- Kramer's Supreme.** Plant Patent 1583. Turkey-red. Very large, peony form with mixed petals and petaloids of full form. Vigorous, compact, upright growth.
- Light Gigantea.** Mostly white with some red markings. A strikingly handsome Gigantea sport. Our propagations are from two large trees producing flowers with an unusually high percentage of white.
- Mathotiana (Mathotiana Rubra, Julia Drayton, Purple Emperor).** Deep crimson, usually with purplish cast that adds to its brilliance. The standard of perfection for large full (formal) double Camellias. At end of season flowers are lighter, show a few stamens.
- Mathotiana Rubra Variegated.** Like above, but mottled white.
- Mathotiana Rosea (Rosea Superba).** Lighter than Mathotiana; very good.
- Mathotiana Rosea Variegated.** Like above, but nicely marked with white.
- Mathotiana Supreme.** One of the great and outstanding Camellias of all time. A sport of Mathotiana producing large, loose peony-form flowers interspersed with showy golden stamens.
- Mattie O'Reilly.** Coral-rose-pink. Very large peony form, with some petaloids. Healthy bush, but develops slowly. Give it time and it will produce large, strikingly beautiful flowers.
- Mrs. D. W. Davis.** Largest of all *Camellia japonica*; some flowers measure 8 inches across. Semi-double form; lovely very light pink color. Large, dark green foliage. This is a great Camellia everybody should have, and we have excellent, sturdy, field-grown bushes. 2-yr. grafts, \$15.00 to \$20.00; 1-yr. grafts, \$7.50 to \$10.00 each.
- Mrs. Lyman Clarke.** Very light pink. Medium large, semi-double to peony form. A lovely flower on an extremely hardy bush. Blooms in mid-season.
- Nina Avery.** Lovely light pink with white stamens, tipped brown. Medium, semi-double to loose peony-form flowers with crinkled, erect center petals irregularly interspersed with stamens.
- Oneita Holland.** A most outstanding white Camellia. Very large, semi-double to peony form, with loose petals and showy golden stamens. 1-yr. grafts, \$7.50 to \$10.00.

POPULAR *Camellias* At Popular Prices

Pearl Maxwell. Light pink imbricated formal double. Large, sometimes 5½ inches across. Late bloomer. Heavy, dark green foliage; erect uniform bush. A chaste and beautiful Camellia.

Pink Champagne. Soft pink. Very large, semi-double with irregular petaloids. Vigorous, upright growth. A valuable addition to newer Camellias.

Sally Harrell. Almost a perfect White Debutante. Habit of growth and early flowering like it. One of the best Camellias from Thomasville. 2-gallon, own-root, \$3.50; Egg Can, \$6.00.

Starlet. Rose-pink. Very lovely miniature with incurved, star-like petals.

Tickled Pink. Fluorescent pink. Large peony form with large, fluffy outer petals and group of petaloids in center. Vigorous, upright grower. Fairly early bloomer. 1-yr. grafts, \$10.00.

Tomorrow Variegated. A fine sport of Tomorrow, with all the good qualities of the parent plant. Our propagations were taken from twigs where flowers showed much white. They will not all reproduce as well. Any Variegated Tomorrow is good, but like Ville de Nantes, we suggest you check the bloom if you are looking for "mostly white."

Tomorrow. One of the most notable of Camellia introductions in recent years. Raised as a seedling by Mrs. Ross Hayes, of Thomasville. Very large, semi-double to loose peony-form flowers, often 6 inches across, sometimes deep pink at the beginning of the flowering season but usually light red. Produced rather freely for a Camellia of its size, on a strong, symmetrical bush with dark green foliage. Like the other Camellias we grow, our larger plants of Tomorrow are all field grown, and the quality is well above the average.

Ville de Nantes, Light Strain. All plants were grown from scions where flowers were mostly white. This does not guarantee absence of some dark flowers, but does give a superior type. Ville de Nantes has been called the world's No. 1 Camellia, for it wins more ribbons than any other variety.

White Empress. Very large, semi-double, pure white with golden stamens. Fairly early; very hardy for a white Camellia.

Wildwood. One of the choicest of recently introduced light pink Camellias. Very large, semi-double to peony form; light rose-pink. Upright, compact growth.

MANY OTHER *Fine Camellias*

In limited supply, practically all plants in containers, we have many choice Camellias, impossible to describe in this catalog for two reasons: lack of space and we just simply do not have many plants. But what we have are good, and guaranteed true to name. The assortment includes these varieties:

Adah Pieper, Agnes Rowell, Alba Fimbriata, Anita, Anita's Triumph, Ann Fowler, Ann Miller, Ann Smith Variegated, Ann Wahl, Ballet Dancer, Barbara Woodruff, Beatrix Hoyt Variegated, Betty Robinson, Betty Sheffield Silver, Billie McCaskill, Blush Eidson, Brehm's Madonna, Bride's Bouquet, Brilliant Review, Caroline Browne Variegated, Charlotte Bradford, Cho-no-Hanagata, Clara Green, Coral Pink Lotus, Creation, Daitairin, Dear Jenny, Dian Hartman, Dian's Fancy, Don Mac, Don Mac Variegated, Donna Kaye, Edelweiss, Edwin H. Folk Variegated, Elizabeth Dowd, Elizabeth Holmes, Emmett Barnes, Ethel Davis, Ethel Davis Variegated, Evalina, Faith, Faith Variegated, Five Star General, Flame, Flame Variegated, Flora Hollingsworth, Frank Baker, Frizzle White, Funny Face Betty, Geisha Girl, Gladys Wannamaker, Glen 40, Gold Dust, Haku-Rakutan, Hallmark, I Believe, Irene Coker, Irene Rester, Island Echo, Jack McCaskill, Jaylyle, Joyce Butler, Judge Marvin Mann, Judge Talbot, Julia France, June McCaskill, Kaki, Kate Thrash, Kate Thrash Variegated, Kitty, Lady Clare, Lady Clare Variegated, Lady Macon, Lallarook, Laura Walker, Laura Walker Variegated, Liz Beebe, Lucy Hester, Lynne Woodruff, Magic Moments, Majorette, Margaret Ratcliffe, Margaret Tourje, Margaret Wells, Mary Wheeler, Mathotiana Supreme Variegated, Maylene Wong, Mercury, Mercury Variegated, Miss Frankie, Mrs. Shepherdson, Nannie Brown, Nez Smithwick, Nick Adams, Pink Explorer, Pink Ice, Pink Woodville, Prelude, Princess Lavender, Red Buttons, Red Rhythm, Reg Ragland, Reg Ragland Variegated, Richard Nixon, Rose Eidson, Rose Gish, Rosemary Ellison, Sadie Mancil, Sarah Ehrlich, Silver Anniversary, Sputnik, Stella Sewell, Stewart's White Supreme, Sugar Babe, Sunset Glory, Sunup, Tinker Bell, Tinsie, Valerie, Vulcan, Vulcan Variegated, White Fairy, Winifred Womack, Winter Morn, Wonder Child, Yvonne Tyson and others.

Miscellaneous Plants

In limited supply we have a good assortment of **Kurume** and **Indica Azaleas**, **Oriental** and **Evergreen Magnolias**, **Tea Olives**, **Hollies** and many other plants, offered to those who will call at the nursery. There is fine quality, and prices are reasonable.

Violet plants, large purple **Gov. Herrick**, 12 for \$1.50; 50 for \$5.00; \$8.50 per 100, postpaid. **Stokesia plants**, 25c each; 12 for \$2.50; \$20.00 per 100, express collect.

NATIVE AZALEA, AUSTRINA

Native AZALEAS

Colorful, Fragrant
Profuse and
Completely Hardy

Some of the loveliest colors in Azaleas are found in our hardy native, deciduous varieties. For years we have diligently collected the finer types, cut them back and grown them into select, stocky plants, which are far superior to those often offered as collected from woodland.

In Baker County, Georgia, we collected the clearest yellow forms of *Azalea austrina* which is rare, and in extreme Southwestern Georgia and Southeastern Alabama we secured the best types of the highly fragrant *Azalea alabamensis*. Other native varieties were collected in South and Central Georgia. Native Azaleas bloom late, thus extending the Azalea season far into April. Being native, they have withstood every extreme of temperature for generations, and for dependability and beauty should find a place in every garden where Azaleas are used.

Azalea austrina. This beautiful Azalea is found in Northwestern Florida to Central Georgia. All we offer this year are the best shades of yellow, the finest types of this species. At Hjort's Azalea Woodland attracts more attention than any other variety.

A. alabamensis. A highly fragrant and very scarce native Azalea. White, or white with yellow spot. Very choice and desirable. Sold out for this season.

A. calendulacea. Native in Central Georgia to the Carolinas, but fairly well adapted to Southern Georgia. Large flame-red flowers.

A. canescens. The most common of the native Azaleas and found throughout Southern Georgia and Northern Florida, growing on moist but well-drained soil. Light pink. Blooms a little earlier than other native Azaleas.

PRICES OF NATIVE AZALEAS

	Each	3 For	6 For
18 to 24 in., stocky, from 2-gal. cans	\$2 50	\$7 00	\$13 00
2 to 3 ft., stocky, from egg cans	3 50	10 00	19 00
3 to 4 ft., stocky, from egg cans	5 00	14 00	24 00

EVERGREEN *Azaleas*

In limited supply for those who want top quality for foundation plants or other uses where the best is desired, we have some compact, shapely evergreen Azaleas, well set with flower buds. Varieties include Judge Solomon (Pink Formosa), Mrs. George Gerbing (best white), Pride of Dorking (red), George L. Taber (light pink), Lawsall (salmon) in Indicas. And Snow, Coral Bells, Hinodegiri and others in Kurumes. \$2.00 to \$5.00 each. See these at nursery or write for details.

Also, some varieties in smaller plants at 50c to \$1.50 each. These should not be confused with small-rooted cuttings or liners.

All Rose Plants shipped postpaid

Aztec. Plant Patent 1648. Deep, rich, intense scarlet-orange. Fine buds and large, shapely flowers; plant vigorous and well foliaged. Whoever said all red Roses are alike ought to see this one; it is strikingly different. \$2.75.

Briarcliff. Rose-pink; large, double and fragrant. Stiff stems, good plant growth. \$1.25.

Burnaby. Plant Patent 1314. Gorgeous light yellow blooms of finest exhibition size. Long, tapering buds and large flowers on stiff stems. Bush is sturdy and vigorous. \$2.50.

Charlotte Armstrong. A truly great Rose, second only to Peace in national popularity. Buds are long pointed, carmine-red; open flower cerise. Long stems, vigorous growth. Should be in every collection of Hybrid Tea Roses. \$1.75.

Christian Dior. Plant Patent 1943. All-America Winner for 1962. An unusually beautiful new Rose, well nigh perfect for its many good qualities. Crimson-red overlaid with iridescent scarlet, combined with exquisite form. The bush will be an easy one for anybody to grow, for it is very strong and vigorous. Blooms come one to the stem and last long. Wonderful for cutting; at night under electric light this Rose shines! We have other good red Roses to sell, but we think Christian Dior "sets the fashion" and is the best red Rose to date. See illustration on front cover. \$3.50.

Christopher Stone. Long-pointed bud; flower large, fairly double, scarlet overlaid crimson. Old Rose fragrance. \$1.25.

Chrysler Imperial. Plant Patent 1167. Vivid crimson with darker overtones; large, very double, highly fragrant. Compact, sturdy growth. Does not blue rapidly like some very dark varieties. A great favorite in many gardens. \$2.50.

Confidence. Plant Patent 1192. A very lovely and comparatively new Rose from the originator of Peace. It is a peach-toned pastel flower of always notable form. It has long, streamlined buds and large, double flowers on strong stems. \$2.50.

Coronado. Plant Patent applied for. Strikingly showy buds of red, flushed copper-orange to yellow, opening to blooms of deep pink. In our Test Garden the large flowers and vigorous bush have been much admired. \$3.50.

Countess Vandal. Coppery salmon-pink buds and large, high-centered flowers on stiff stems. Always a favorite at Thomasville, where many varieties are grown. \$1.50.

Crimson Glory. All the name implies. Deep crimson-red; very double; very fragrant. In a popularity contest the country over, it stood with Peace and Charlotte Armstrong to comprise the top three. \$1.25.

Dainty Bess. Large, single, wild-rose-pink flowers in clusters. One of the loveliest of all Roses. \$1.75.

Duet. Plant Patent 1903. All-America Winner for 1961. This two-tone pink Rose is borne freely on an exceptionally vigorous bush; flowers long lasting. \$3.00.

COUNTESS
VANDAL

Eclipse. Long, streamlined buds of deep yellow. Vigorous and thrifty, with abundant foliage. We consider it the best non-patented yellow for the Southeast. Has won many European and American awards. \$1.25.

Editor McFarland. A most luxuriant Rose in growth and bloom. Deep pink flowers, sometimes singly, often in clusters. If it were a new Rose today, it would be a Grandiflora, for \$2.50, possibly \$3.00. As it is, it is \$1.25.

Etoile de Hollande. Brilliant crimson. Large, semi-double, fragrant flowers on long stems. Vigorous in growth, continuous in bloom. Easily the most popular of all dark red, non-patented Roses. \$1.25.

First Love. Plant Patent 921. The most streamlined Rose in the garden. Long, tapering buds of pale dawn-pink. A strong-growing plant with bright green foliage and many lovely blooms carried singly on long stems. \$2.25.

Forty-niner. Plant Patent 792. A striking bicolor. The face of the petals is a vivid crimson, while the reverse is yellow. \$2.50.

Garden Party. Plant Patent 1814. One of the loveliest Roses ever created, a successful cross of Peace and Charlotte Armstrong, having the appearance of being a "White Peace." The blooms are a combination of pastels. The rich ivory-white center becomes creamy, and the open flower is flushed with apple-blossom-pink. The stems are long, the cut flowers long lasting. Growth of bush is vigorous. Truly a notable Rose that has come to stay. \$3.00.

Golden Dawn. One of the most outstanding of the older Hybrid Tea Roses. The name is misleading, since it is not a golden flower. The bud is apricot shaded rose; the fully open flower is sunflower-yellow. The blooms are large, on strong stems with superior foliage. \$1.50.

Hawaii. Plant Patent 1833. A superb Rose of coral color. No color picture is ever anything like as beautiful as the flower. Long-pointed buds open into large, double flowers that hold their color until the last petals fall. The bush is vigorous, and the blooms come singly on long stems. \$3.50.

Helen Traubel. Plant Patent 1028. A beautiful Rose of vigorous growth, producing many fairly double blooms on long stems; long-pointed buds. Salmon to apricot-pink. Some South Florida gardeners prize it highly; fine for all the South. \$2.75.

Imperial Queen. Plant Patent applied for. An excellent new rose-red Hybrid Tea. Most red Roses are dark like Etoile de Hollande or Mirandy, or are orange-red like Montezuma or Aztec. Here is one that is delightfully different, darker than Charlotte Armstrong and lighter than Christian Dior, producing large, double flowers on stiff stems with large, green foliage. Bush growth is vigorous. Imperial Queen has been much admired in our Test Garden. We like this Rose, and feel privileged to offer it. \$3.50.

Kaiserin Auguste Viktoria. White, with slight lemon tint in center. Beautiful bud and large, double flower when disbudded. The most satisfactory of the older white Hybrid Tea Roses. \$1.25.

Killarney Queen. Finest of all the Killarneys. Deep rose-pink, semi-double; lasting. \$1.25.

ECLIPSE
The streamlined Rose

HYBRID TEA ROSES

King's Ransom. Plant Patent applied for. All-America Winner for 1962. The best yellow Rose to come along in a decade. Buds are long pointed and flowers are quite large. The golden yellow color holds in the hottest summer sun. In our Test Garden and in the fields where we produce the plants we sell, the growth has been spectacular—much better than most yellow Roses. Stems are good, foliage is shiny green. If it grows anything like as well elsewhere as it does at Thomasville, and surely it must, it will become the answer to the quest for a better yellow Rose for the South. See illustration on back cover. \$3.50.

Mirandy. Plant Patent 632. Very large, double, dark garnet-red; highly fragrant. Upright and vigorous in growth. Usually produces one flower to the stem, eliminating disbudding and always producing specimen blooms. At Thomasville, where many varieties have been tried, it is a favorite dark red. \$2.25.

Mojave. Plant Patent 1176. A Rose of unusual color. Buds are deep orange-red, opening to nasturtium-red. Fairly large, double flower; fragrant. \$2.75.

Mrs. Charles Bell. Sport of the well-known Radiance, and identical with it in vigorous growth, freedom of bloom and size of flower. Always dependable, always lovely, always rewarding. \$1.25.

New Yorker. Plant Patent 823. A very good double, bright red Rose that has maintained its popularity throughout the years. The bush is upright and sturdy, prolific in bloom for a large variety. \$2.50.

IMPERIAL QUEEN

Nocturne. Plant Patent 713. Deep cardinal-red; long-pointed buds and good flowers on stiff stems, usually one perfect flower to the stem. Has long been a favorite in the Lower South. \$2.25.

Peace. World's No. 1 Rose. Winner of all top national awards in America, Europe and everywhere Roses are grown. Peace is a strong grower with large, handsome foliage and produces very large, very double and lasting flowers of soft yellow, flushed and tinged with pink. An exquisite Rose. \$1.50.

Peaceport. Plant Patent 1282. A deep pink sport of Peace. Bush is a strong grower and free bloomer. Flower double, not as large as Peace. \$3.00.

Perfecta. Plant Patent 1604. Formerly called by its European name, Kordes Perfecta. A very beautiful two-tone pink. In the Deep South the bush will grow and bloom well if provided some afternoon shade. A little extra effort with this one is well worth while. \$3.00.

Soeur Therese. Long-pointed, chrome-yellow buds, opening to daffodil-like flowers. A favorite in many localities. \$1.25.

Sunlight. Plant Patent 1576. One of the finest yellow Roses in years; during the test years it always scored high with us. Bud fine pointed opening to a most strikingly beautiful and shapely flower of deep, clear yellow. The foliage is large and attractive, on erect, well-balanced plants. \$2.50.

Sutter's Gold. Plant Patent 885. Long-pointed, bright yellow buds shaded orange. Vigorous, free branching and fine for cutting. \$2.25.

The Doctor. Sparkling pink, pointed bud; large, rose-pink flower. Does not grow fast first year; afterward is large, thrifty and outstanding. For those who can exercise a little patience and give it a little extra care it usually becomes a most charming and appreciated pink Rose. \$1.50.

HYBRID TEA ROSES

Tiffany. Plant Patent 1304. All-America Winner for 1955. A strikingly beautiful warm pink Rose, shading to yellow at the base. Lovely, long-pointed buds, opening into large, double flowers that last well; produced on strong, stiff stems. The bush is of vigorous growth; the bloom is plentiful. Favorable reports from tests here and the entire Southeast show that it is dependable. We highly recommend this Rose and believe that Tiffany has come to stay a long, long time. \$2.75.

White Knight. Plant Patent 1359. A comparatively new and very good white Rose that was the first of its color to win an All-America award. It is a splendid Rose for cutting purposes, with long-lasting flowers. The buds are long pointed, and the blossoms are pure white. \$2.75.

Yellow Talisman. Buds golden yellow, open flower a little lighter. A profuse and constant bloomer on a strong bush. Very successfully grown at Thomasville. \$1.25.

See Roses Here

As this catalog goes into the mails, Roses are blooming profusely in our large Rose test garden and in the fields, and we urge all those who would like to see many varieties from some of the oldest to the very newest, to come by and see us in September or October. You don't have to buy every time you come here. Come and enjoy this very lovely and colorful upsurge of fall bloom with us!

All-America
Winner 1960

The very lovely and
vigorous new Rose,
GARDEN PARTY

Grandiflora ROSES

Combining the beautiful form of the Hybrid Tea and the abundance of bloom of the Floribunda the Grandifloras are the new super Roses. To the excellent varieties catalogued last year, we have added the new All-America Winner for 1962, John S. Armstrong. All the Grandifloras are vigorous in growth, producing flowers on stiff stems, sometimes singly and sometimes in clusters, from spring until late fall.

Buccaneer. Plant Patent 1119. Brilliant and non-fading yellow, without a tinge of other color. Holds color well throughout hottest summer weather. Vigorous Grandiflora bush; long stems; pointed buds and good open flowers. \$2.50.

All-America Winners have been thoroughly tested by most exacting standards in gardens in all sections of America

JOHN S. ARMSTRONG
All-America Winner for 1962

Carrousel. Plant Patent 1066. A showy and satisfactory dark red Rose, very vigorous in growth, branching and prolific. Carrousel thrives in many sections of America and often does well under adverse conditions. \$2.00.

Golden Girl. Plant Patent 1912. A valuable new yellow Grandiflora. Long-pointed buds and large golden flowers are abundantly produced on a well-branched and vigorous bush. A touch of fragrance adds charm to this Rose. \$2.50.

Spray or Dust your rose plants during the growing season for best results.

BUCCANEER
Holds its golden color
through all the seasons

©
GOLDEN GIRL
Vigorous and prolific

John S. Armstrong. Plant Patent 2056. This glorious new Grandiflora climaxes 20 years of scientific research by Armstrong Nurseries (the firm that has given us such good roses as Charlotte Armstrong, Mirandy, Garden Party and others) to develop the complete Grandiflora and one worthy to bear the name of its founder. The large, 4-inch blooms are borne in clusters, but individual stems are ample for cutting. The color is a glowing, rich, deep red. Like all Grandifloras, vigorous in growth. \$3.50.

June Bride. Plant Patent 1770. Strongest grower of all white bush Roses; in our Test Garden is 8 feet tall. Fairly large, ivory-white blooms, mostly in clusters, appear in profusion over a long season in the Lower South. \$2.50.

Montezuma. Plant Patent 1383. A fine Rose, bringing a new color to the Grandiflora class. For quality of bloom, vigorous growth and continuous flowering, we think this variety has come to stay. Orange-scarlet buds open to salmon-orange blooms of good substance on long stems. \$2.75.

Rose Plants in Containers

Available April 1 to summer. For those who were unable to plant in fall or winter, or who wish to add to existing beds, these plants in 2-gallon containers with loose bottoms are ideal. Plants remove easily with good ball of soil. Many of the fine plants in our Rose Test Garden were set from cans without loss in April and May. Please call at the nursery for container Rose plants, for we are sorry it is not practical to ship Roses in cans.

GRANDIFLORA ROSES

Pink Parfait. Plant Patent 1904. All-America Winner for 1961. A soft blending of pastel pink tints makes this a different and colorful bloom. The bush is a rank grower and a very profuse bloomer, with fairly large flowers in clusters. \$3.00.

Queen Elizabeth. Plant Patent 1259. This very lovely Rose has come to be easily the favorite pink variety in the Southeast. An All-America Winner in 1955, it rapidly climbed in popularity. Queen Elizabeth is a charming color, a blending of carmine-rose with dawn-pink. A profuse bloomer on a strong bush, sometimes with only one flower to a stem, sometimes in clusters, it has remarkable lasting qualities as a cut flower. It is really a "Queen." \$2.50.

Roundelay. Plant Patent 1280. A very dark red Rose of great merit, and a fine addition to the Grandiflora class. Stems are long and strong enough for cutting. Flowers, some on single stems, some in clusters, are delightfully fragrant. Anybody can grow Roundelay, one of the most vigorous of all Roses. \$2.50.

PRICES ON GRANDIFLORA ROSES

Rose
All-America
Winner 1955

It is difficult to capture in printer's ink, despite the greatest efforts, the beauty of a Rose. Queen Elizabeth is one of these. You must see the "Queen" on the bush or in a vase to catch its full beauty and charm.

Floribunda

ROSES

What those who have become acquainted with Floribunda Roses like so much about them is that in the Lower South, including Florida, they are the easiest to grow, almost like common shrubs. And who could ask more of a plant that blooms all season, as does the Floribunda, beginning the first spring and continuing year after year.

Aside from the sturdiness and ease of culture that make them wonderful for beds and borders, Floribundas come in a very wide range of color, make lovely cut-flower arrangements and as such last very long. No wonder people are saying, "Floribundas are Fascinating."

Amy Vanderbilt. Plant Patent 1585. Here is a more double Rose in the new lavender-lilac shade; in our garden the most admired of these. Blooms well on a very vigorous bush. Lovely with yellow or light pink varieties, or just by itself. \$2.00.

Bouquet. Large clusters of semi-double, deep pink bloom. Long lasting as a cut flower. Large, attractive foliage. A very desirable Floribunda. \$1.50.

Cecile Brunner. The "Sweetheart Rose." One of the treasures of old Southern gardens, just as valued today as in the past. It is a Tea-Polyantha that develops into a large, vigorous bush, producing an abundance of very small, double, light pink blooms in clusters over a long season. \$2.00.

Chic. Plant Patent 1286. A Floribunda of exceptional merit for the South and perhaps for other sections. It is a Rose of perfect Floribunda characteristics, much branched, vigorous, flowering freely in clusters. The color is salmon-pink in the bud stage, becoming bright pink with faint salmon shading. In our Test Garden and nursery fields it bloomed right on through the hottest weather, and we have seen it performing well in Alabama, Florida and North Carolina. For those who like double pink bloom of practically the Ma Perkins color but borne in greater profusion, on good stems fine for cutting, this is a very nice new Floribunda. \$2.00.

© CHIC. Double, fragrant, lasting

Crimson Rosette. Plant Patent 901. Coiled "rosette" shape; deep red, very double flowers in clusters on stiff stems. As a bedding variety it is superb, but it has much merit as a long-lasting cut flower. This variety is something new and charming in Floribundas, and worthy of a place in any garden. \$1.50.

Dagmar Spath. Pure white flowers. Free flowering, producing masses of bloom with golden stamens. An ideal bedding Rose of medium height. \$1.50.

Else Poulsen. One of the older Floribundas, but widely grown because it is a most satisfactory performer. The semi-double, bright rose-pink flowers are carried on erect, strong plants. Good for a hedge or as a bedding variety; also good for cutting. \$1.25.

Fashion. Plant Patent 789. Buds Oriental-red, opening to a luminous pink, overlaid with gold, becoming coral with age. The bush is vigorous and branching in habit, and blooms all through the Rose season. All the praise continually heaped on this Rose is well deserved; its popularity increases and it is a favorite wherever grown. \$1.75.

Fire King. Plant Patent 1758. All-America Winner for 1960. One of the finest Floribundas ever produced. The color is spectacular—coral-vermilion, and the medium-sized, extremely double flowers in clusters are very striking. As a cut flower under artificial light at night it fairly shines. Blooms through the hottest weather. The strong plant has stood out in our Test Garden for several years. The dark green foliage fills out the plant to give it a well-rounded appearance. You will like Fire King. \$2.50.

THOMASVILLE NURSERIES

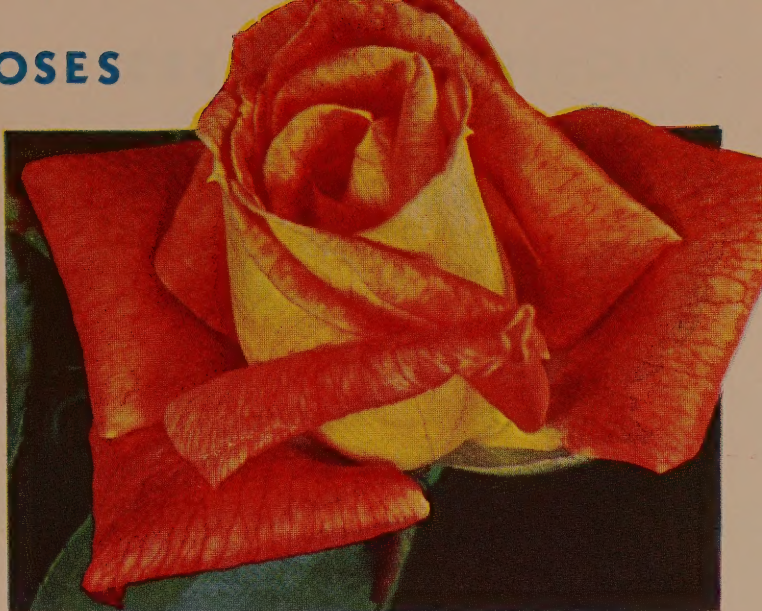

FLORIBUNDA ROSES

Floradora. Constantly in bloom and an entirely new shade in Roses—a brilliant cinnabar-red, as arresting under artificial light as in the garden. Floradora blooms are always eye-catchers; everyone stops to admire them. As a cut flower it is exceptionally long lasting. Floradora should be in every Floribunda garden. \$1.25.

Frensham. Deep crimson-red flowers of medium size, borne in typical Floribunda clusters. Very compact and branching growth, making it an excellent border, hedge or bedding variety. Sturdy in growth and constant in bloom. \$1.25.

Geranium Red. Plant Patent 811. One of the most unusual and most admired red Floribundas at Thomasville. In color it is all the name implies, and the flowers are somewhat larger than most varieties of this group. The camellia-like flowers are a vivid, bright, geranium-like red, and no picture does it full credit. The bush is a strong one, flowering from spring till late fall in the South. As a bedding Rose and as a cut-flower variety, this distinctively different Floribunda has been much praised by many who have grown it. \$1.50.

Golden Slippers. Plant Patent applied for. All-America Winner for 1962. A brilliant color breakthrough in Floribundas! The red and gold buds flame open into a brilliant fluorescent orange, unlike the color of any other Rose. The bright color holds until the flower is fully open, then softens ever so slightly to a pastel orange. The bush is vigorous, of perfect Floribunda habit, and the medium-size, fairly double flowers in profuse clusters appear throughout a long season, April through October in the Lower South. Anyone will like this unique new Floribunda. \$2.50.

GOLDEN SLIPPERS. All-America Winner for 1962

Goldilocks. Plant Patent 672. The buds are miniatures of Hybrid Tea perfection, opening into fully double, golden flowers. The bush is of strong and compact growth. Stems are strong and flowers fine for cutting. \$1.50.

Improved Lafayette. Large; semi-double; cherry-red. Very strong grower and profuse bloomer over a long season. Ideal for borders or group plantings where Floribundas are most effective. \$1.25.

Ivory Fashion. Plant Patent 1688. One of the most attractive of white Roses, and among the relatively few Floribundas to have won the coveted All-America award. Flower a little larger than the average Floribunda. Just as lovely open flower as bud. \$2.00.

Ma Perkins. Plant Patent 1143. 1953 All-America Winner. Most charming in color and form. Buds are coral with tinges of red and a touch of yellow at the base; open flowers are lovely coral-shell-pink. Compact and vigorous. A worthy companion of Fashion and Vogue. \$1.75.

Perle d'Or. The salmon "Sweetheart Rose." Much like Cecile Brunner in form; salmon-pink in color. \$2.00.

Pinkie. Plant Patent 712. A very lovely little Rose of perfect Sweetheart size and form. Deep pink, opening lighter. A most profuse bloomer, repeating over a long season. An All-America Winner of 1948. \$2.00.

FLORIBUNDA ROSES

Pink Rosette. Plant Patent 902. A new and lovely form in Floribundas. Beautiful rosette-shaped, small, double flowers borne in large clusters on a small, compact, healthy bush. Flowers are long lasting and very fine for corsages. \$1.50.

Red Pinocchio. Plant Patent 812. Very double, very dark red flowers borne in large clusters on a medium-sized, compact bush. Excellent for hedge and border use. A great bloomer in hottest weather, and a very satisfactory Floribunda everywhere it is grown. \$1.50.

Those Who Love Roses

often care for other flowers, many brilliant in color and of striking form but usually in bloom a short season. There is something so warm and real about the Rose, truly the Queen of Flowers. The Rose, too, comes in a wide range of color, and for constancy nothing can match the bloom it gives in the Lower South, usually 8 months of the year!

Remit direct to American Rose Society, 4048 Roselea Place, Columbus 14, Ohio.

FLORIBUNDA ROSES

The Fairy. A valuable ornamental plant for many uses. It gives hundreds of flowers at a time, keeps blooming from April to freezing weather and thrives with less care than most cultivated plants.

The small, sweet seashell-pink Roses come in big sprays continually. The plant growth is very thick and bushy, densely branching and densely covered with small, shining, pretty foliage right down to the ground, as pretty as boxwood and needs no spraying. It will grow to 4 feet in height and just as broad, or can be kept lower if pruned low each spring. \$1.50.

Rosenelfe. A well-nigh perfect Floribunda. Vigorous in growth, profuse and constant in bloom, with small, double flowers in typical Floribunda cluster form. Rose-pink color; lasts long as a cut flower. \$1.50.

Four Favorite Floribundas

Geranium Red. Orange-scarlet..

Goldilocks. Yellow.

The Thomasville Rose Show

April 27, 1962

Rose time in the Deep South is celebrated annually through the staging of the Thomasville Rose Show, the most spectacular flower show in the Southeast by the Thomasville Garden Club, assisted by the Chamber of Commerce and other civic groups. There will be tours of our Rose Test Garden, some other gardens, the Rose Show and special exhibits at the Veterans Domiciliary.

The 1962 show will be one of great beauty, size and merit. If you miss seeing the Thomasville Rose Show you miss a delightful experience. All Thomasville welcomes you!

HJORT'S

Old-Fashioned Tea Roses

This group of Roses is perfectly adapted to the hot, moist summers of the Lower South, including Florida, and soils that are sandy, although the Teas grow all over the entire South in any good Rose soil.

Tea Roses were brought to Europe from China's gardens in the late 1700's. In northern Europe they were not well received, but in southern France they found conditions of climate and soil suitable and rapidly gained favor. Soon they were brought to America. They did not thrive in the North, but once planted in the South, especially along the Gulf and coastal areas, became immensely popular and outlived other classes of Roses.

Most Teas are not considered cut-flower varieties, but some produce large flowers on stiff stems. The best of these are Darling, Baroness Henriette Snoy, William R. Smith, Maman Cochet, Mrs. Dudley Cross and Mme. Lambard. A lot of the others are much better than generally believed. The pink varieties are the favorites in the Teas, for while the reds grow vigorously it is admitted none of them have color comparable to Crimson Glory and Etoile de Hollande, nor are there yellows like Eclipse and Soeur Therese—they are lighter. One does not plant Teas for flowers like Peace and Chrysler Imperial, but for profusion of bloom, ease of growth and length of life.

If you are not so sure you can grow good Roses by all means start with the Teas. You will love them for their dependable qualities. And really, they are beautiful!

All Old-Fashioned Roses are \$2.00 each, 3 for \$5.25, 6 for \$10.50, 12 for \$20.00, by Parcel Post, prepaid

Being an "old" variety is nothing against a plant. Rather, the old varieties that remain in favor occupy a unique position, for they stay with us strictly on merit.

Baroness Henriette Snoy. A comparatively new member of the Old-Fashioned Tea group, and one of the most beautiful and satisfactory of Roses for Southern gardens. The lovely, pointed buds and large, double, well-formed flowers are peach-pink, shaded cream, and are freely produced on vigorous stems. The bush is spreading and vigorous, with abundant, heavy foliage, and most resistant to blackspot. We are the only firm in America to offer this Rose, and many who have seen it in our gardens and fields consider it to be the finest of the Teas, which is saying much, for there are other choice ones.

Bon Silene. Deep rose to carmine, almost red in the fall; large and fairly double. Miss Julia Wright in Thomasville has one her grandmother planted over 90 years ago. Like to plant one for your posterity?

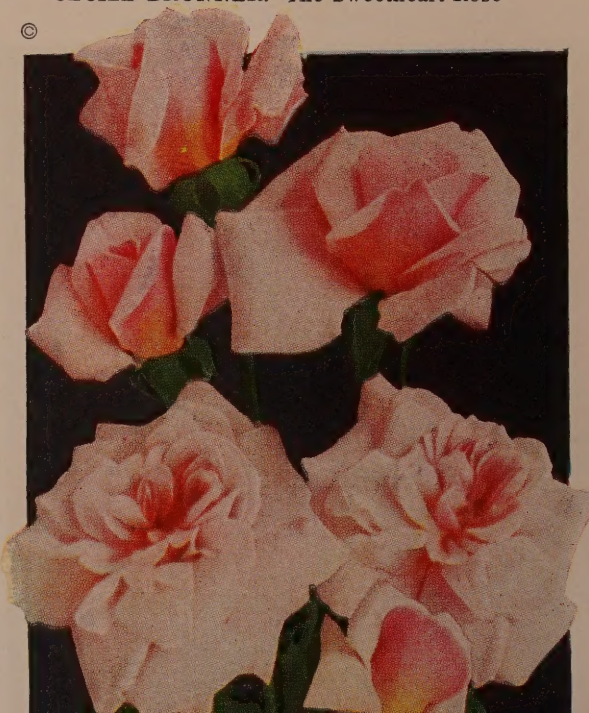

Catherine Mermet. Flesh-pink, edges tinted lilac-pink. Buds well shaped; flowers fairly large, double, fragrant.

Darling. A "new" Old-Fashioned Rose. Originated in California and called a Hybrid Tea, but here it has such dominant Tea characteristics that we must put it in this group. Large, double, deep rose-pink buds and blooms on a very vigorous and easy-to-grow bush. Most of the pink Tea Roses are on the light side; here is one that is definitely a deep pink. By special arrangements with the introducer, we were privileged to introduce it in 1960. We like everything about this Rose except the name, which seems to indicate that it might be small, but Darling is a large Rose. We wanted to call it Southland Beauty, a name it deserves.

Cecile Brunner. The "Sweetheart Rose." One of the treasures of Old South gardens, just as valued today as in the past. A Tea-Polyantha hybrid, also classed as a Floribunda, which develops into a large, vigorous bush producing an abundance of small, double, light pink blooms in clusters over the entire Rose season.

CECILE BRUNNER. The Sweetheart Rose

©

Old-Fashioned TEA ROSES

LADY HILLINGDON

CL. DEVONIENSIS

MME. CAMILLE

Duchesse de Brabant. Soft shell-pink. Bud short, globular; open, cupped flower. Growth vigorous and hardy. This dependable old Tea continues to be a great favorite.

Etoile de Lyon. Deep saffron-yellow; large, very double and fragrant. Considered by many to be the finest of the Teas of yellow shading. We are glad we have enough of this variety to offer it this season.

Freiherr von Marschall. Carmine-red; double, vigorous and constant. A fine old Tea Rose.

Gruss an Teplitz. This old Hybrid China Rose has some Tea blood in it. Dark, velvety scarlet; spicy fragrance. Bush very strong and prolific; flowers fairly double.

Lady Hillingdon. Deepest yellow of all Tea varieties. Bud long pointed; flower semi-double, fragrant. Bushy growth; bronze foliage. A favorite Tea Rose.

Louis Philippe. (China.) This is a most unusual Rose of deep red color. Foliage dark and glossy. Compact and vigorous in growth, it is used extensively as a hedge Rose and blooms profusely over a long season. In fact, in mild seasons it blooms throughout the winter in Florida and Gulf Coast areas.

La Sylphide. A Tea Rose of wonderful growth and flowering qualities. Semi-double flowers, almost the color of Pink Parfait shown in the Grandiflora section. Not rated a cut-flower variety, but excellent for growing into a large bush of colorful bloom.

Maman Cochet. Clear silvery pink. Long-pointed bud and large, fragrant flower. This variety does not grow off so rapidly as such Teas as Mrs. Dudley Cross and Mme. Lambard but eventually makes fully as large a bush. One of the best cut-flower Teas.

Marie van Houtte. Canary-yellow; petals tipped lilac-pink. In fall or during a mild winter the flowers show an enchanting lavender cast not seen in any other Rose. Foliage is dark and abundant; growth vigorous and compact. A very lovely and rewarding Tea Rose.

Minnie Francis. An excellent old Tea Rose we thought had been lost. We are glad to have definitely found it and are privileged to offer it again this year. An extremely vigorous grower, well branched, producing flowers much on the order of Mme. Lambard but not quite so dark.

Mme. Camille. Fairly large, well-formed, aurora-pink flowers, veined with white reflections; fragrant. Not very double. Not recommended as a cut flower, but a marvelous bloomer, going well into cold weather.

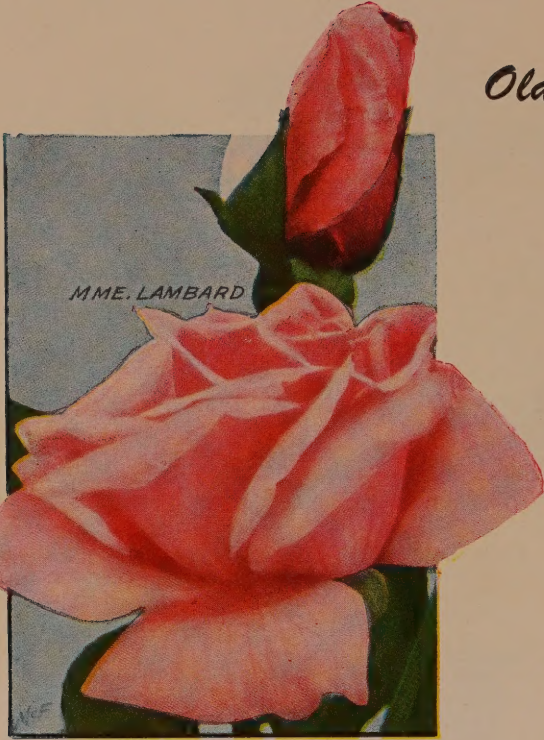

Mme. Lambard. This Rose is one of the great favorites of those who have Tea varieties. In the spring it is carmine-pink, shaded salmon, a little lighter in summer. In fall it is almost red, when it is in its glory. A rank grower and profuse bloomer over a long season that extends into cool weather.

Monsieur Tillier. Sent to us as a red Tea with small blooms like Cecile Brunner. But in the Lower South it grows into a larger bush than a Floribunda, and the flowers are larger. Small, very double, brick-red blooms.

PRINCESS DE SAGAN

Old-Fashioned TEA ROSES

MME. LAMBARD
Long a favorite old Tea Rose

Mrs. B. R. Cant. Deep rose to light red; large, double flowers. Vigorous and profuse; bush is one of the largest of all varieties. One of the best of Tea Roses, it is a great favorite in many places in the South, such as New Orleans, Mobile, Florida and the Carolinas. Ranks right along with William R. Smith, Baroness Henriette Snoy and Mrs. Dudley Cross, and ought to be in every Tea Rose collection.

Mrs. Dudley Cross. Most vigorous of the yellow Tea Roses. Canary-yellow, long, Cochet-like buds, opening light yellow and gradually developing tints of pink—a fascinating combination. This rank-growing, showy and completely satisfactory Rose should be among the first in any Tea collection.

Mrs. Dunlop Best. Perhaps Mrs. Dunlop Best is best described as a glorified Safrano, being larger and deeper in color. A good cut-flower Tea much admired by those who have seen Tea Roses in our gardens and fields the past few years.

Mrs. Herbert Stevens. Bud long pointed, white slightly tinged pink; open flower fairly large and double, pure paper-white. Typical strong Tea growth and free bloom.

Old Gold. A fine, rare and lovely old Tea Rose. It is more pink, than gold—deep pink, shaded gold. Beautiful pointed buds and fairly double flowers. A large bush, blooming freely.

Perle d'Or. A Tea-Polyantha hybrid, called the Salmon Sweetheart Rose, having the same "baby" double flowers in clusters as does Cecile Brunner. At Thomasville it is a great favorite. Some bushes are thirty years old or more in gardens here.

Princesse de Sagan. The best dark red Tea. Semi-double flowers borne profusely on a very vigorous and much-branched, easy-to-grow bush; velvety crimson, shaded purplish. At Thomasville it is a favorite, blooming over a long season, often having a few blooms in a warm spell in the winter.

Rosette Delizy. Fairly large, full, well-formed, cadmium-yellow, with apricot reflexes, outer petals deep pink. Growth very vigorous; profuse bloomer.

Snowbird. Bud long pointed; flower double, high centered, very fragrant; white with creamy center. Foliage leathery. Like other Teas, highly resistant to blackspot.

Snowflake (Marie Lambert). Small, semi-double, pure white blooms borne profusely in clusters over a long season, on a vigorous bush. It can well be used with colored Floribunda Roses. Greatly prized at Thomasville.

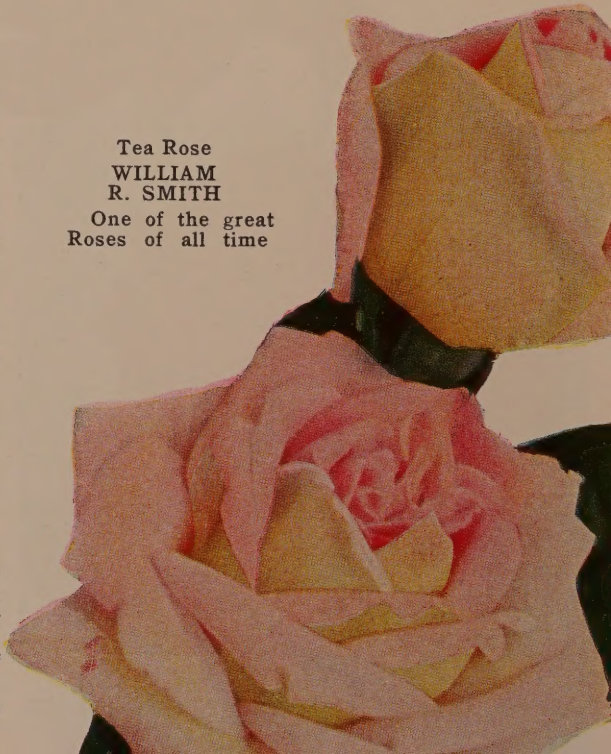

Souv. de la Malmaison. (Bourbon.) Very large, double flower; creamy flesh-pink with rosy center; highly fragrant. A famous old Rose, dating back to 1843, still lovely and still satisfactory.

White Maman Cochet. Sport of Maman Cochet. Long-pointed, white buds, tinged pink, opening into large, double, fragrant flowers. Since its introduction in 1896 it has steadily maintained its position as the leading and best white Tea Rose. While some Teas are not rated as cut-flower Roses, this one is, and should be in every garden of Tea varieties.

William R. Smith. Evaluated by many the finest of all Tea Roses. More people write us or tell us when they visit our garden and fields, of their love for this Rose and their success in growing it, than any other in this group, and there are other Teas of great merit. Beautiful, pointed buds open into large, double, light pink, fragrant flowers, produced on long, stiff stems with a few large thorns. Grows well all over the South and in Cuba. In the Southern tip of Florida it has been called the "Key West Rock Rose," although that seems a peculiar name for a Tea variety that makes so large a bush. William R. Smith should start any collection of Tea Roses.

In limited supply we have a few other Tea varieties.

• Climbing Roses •

Including Old-Fashioned Varieties

Explanation of Symbols: LR., Large-flowered Rambler; Cl., Climber; Se.Cl., Semi-Climber; Cl.Gr., Climbing Grandiflora; Cl.Pol., Climbing Polyantha; Cl.HT., Climbing Hybrid Tea; Cl.T., Climbing Tea; N., Noisette.

Belle of Portugal. LR. Long-pointed buds open into large, semi-double, light pink flowers. Glossy foliage. Rank grower, producing a profusion of bloom in the spring. \$2.00.

Blaze. Cl. Brilliant red sport of Paul's Scarlet. Blooms heavily in spring and repeats throughout summer. Rich, leathery foliage. Vigorous growth. Very showy anywhere it is used. \$1.25.

Blossomtime. Se.Cl. Plant Patent 1240. Superior in every way. Pleasing light rose-pink, some blooms on single stems, some in clusters. Consistent bloomer throughout spring and summer. Foliage large and abundant; growth very vigorous. A pillar-type variety. \$2.50.

City of York. LR. Semi-double; pure white with golden stamens. Dark, glossy foliage. Awarded Gold Medal of American Rose Society. \$1.50.

Cl. Cecile Brunner. Cl.Pol. A strong climbing form of the "Sweetheart Rose." Bears a great profusion of tiny double light pink flowers on a very robust-growing plant. \$2.00.

Cl. Charlotte Armstrong. Cl.HT. A very vigorous sport of the famous bush Rose of this name. \$1.50.

Cl. Columbia. Cl.HT. A fine climbing sport of the bush Columbia, bearing silvery pink flowers on good stems for cutting. \$1.50.

Cl. Crimson Glory. Cl.HT. Plant Patent 736. Rich crimson-red, very large, double and fragrant. Bush extremely vigorous. Flowers throughout all the Rose season. The most admired red climber in our collection. \$2.75 each; 3 for \$7.20.

Prices of Climbing Roses

Climbing Roses

Grossherzog Ernst Ludwig. N. Commonly called the pink Marechal Niel. Large, double, fragrant, Marechal Niel-like blooms borne freely on a very rank-growing bush. Easy to grow. Give it plenty of room, and it will be a wonderful sight. Pink, shaded yellow. \$2.00.

Guinee. Cl.HT. Very large, double, dark red; vigorous. \$1.50.

Lamarque. N. Pure white with lemon center; medium size, double, fragrant. Because of its excellent qualities this old Rose, given us by Marechal of France in 1830, still graces many Southern gardens. \$2.00.

Marechal Niel. N. Long a favorite old climber of the South. Double, fragrant, deep yellow. \$2.00.

New Dawn. Cl. An everblooming form of the lovely light pink Dr. Van Fleet. \$1.50.

Pink Cherokee. Lovely, Dainty Bess-like pink blooms borne profusely in the spring on a typical Cherokee plant of strong habit. A distinctive old Southern Rose. \$2.00.

Reine Marie Henriette. Cl.HT. One of the best old climbers. Vigorous in growth, producing many cherry-red blooms, fairly large and double. \$2.00.

Reve d'Or. N. Buff-yellow; medium size; fragrant. Foliage rich green, extending to base of plant. A free-blooming climber that is a great favorite at Thomasville. \$1.75.

Solfaterre. N. A very fine member of the old Noisette group. Large, lemon-yellow blooms, double and fragrant, borne abundantly in repeating surges throughout the Rose season. \$1.75.

Yellow Banksia. While this one is not fragrant, it has all the other characteristics of White Banksia. Beautiful, small, very double flowers in clusters cover the plant. Always the first Rose to bloom at the end of winter. \$2.00.

We ship Rose plants from November 1 to March 31. A minimum order should be \$3.50. Otherwise please add 50c for postage and handling.

CL. DAINTY BESS. \$1.50.
Very lovely and prolific

Cl. Devoniensis. Cl.T. White, faintly tinged pink; large, double. Strong growth, recurrent bloom. A great favorite where it is known. \$2.00.

Cl. Etoile de Hollande. Cl.HT. Deep crimson-red; semi-double. Vigorous, prolific; flowers over a long season. \$1.25.

Cl. Papa Gontier. Cl.T. One of the very best of red climbing Roses for the Lower South. A very vigorous, long-running climber. A large bush will produce many fine, semi-double, rose-red blooms with stems long enough for cutting. \$2.00.

Cl. Peace. Cl.HT. Plant Patent 932. A perfect climbing sport of the famous Peace. Very robust in growth, producing heavy canes, large glossy foliage and plentiful bloom for a large variety. For anyone who cannot grow bush Peace well, we advise using this climber. From it you can cut many fine flowers on stiff stems, just as if it were a bush variety. \$2.50.

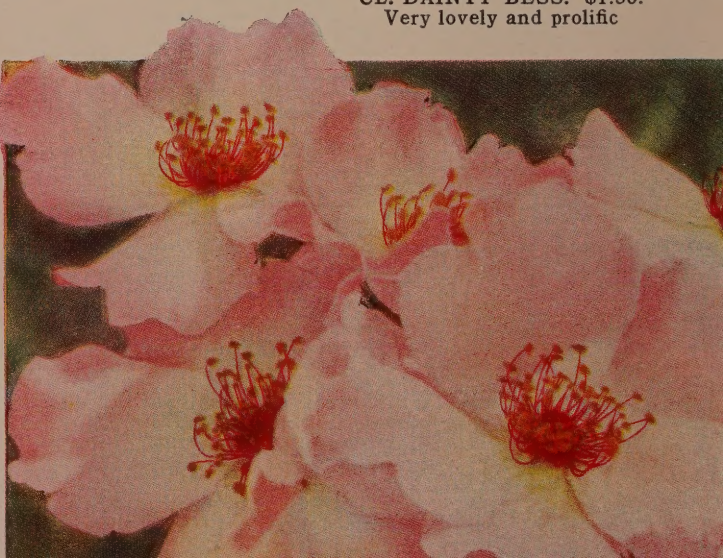

Cl. Queen Elizabeth. Cl. Gr. Plant Patent 1615. A vigorous and free-flowering sport of bush Queen Elizabeth, bearing soft carmine-rose and dawn-pink blooms on almost thornless stems, early spring to late fall. \$2.50.

Cl. Talisman. Cl.HT. A vigorous sport of bush Talisman; identical with its parent in form and color. Those who have not done well with the bush variety should try this climber; it is very strong, showy and dependable. \$1.25.

Cloth of Gold. N. A very rare and vigorous old Noisette. Performs like a Climbing Tea Rose. Will climb 30 feet or more. Deep yellow; fragrant; repeats some. Easily one of the best Noisettes. \$1.75.

Elie Beauvillain. N. One of the most beautiful and profuse of all vigorous climbing Roses for the South. Large, full flowers of shining rose-pink with yellow base. A truly wonderful old variety. \$2.00.

Gloire de Dijon. N. Where Elie Beauvillain is pink with yellow base, Gloire de Dijon reverses the combination. Both are extremely vigorous, not given much to repeat bloom, but oh, what a magnificent show in the spring! Still a favorite after more than 100 years. \$2.00.

The LIRIOPE

A brilliant and useful border plant, long used at Thomasville, and becoming increasingly popular all over the South. No one who has seen the Liriopes at Thomasville will ever forget the sight. Liriope is a remarkable plant. It will grow in rather heavy shade or in full sun and in very dry locations but is more luxuriant where there is enough moisture. It is used to border walks and beds, on slopes to prevent washing, as a ground cover, in porch boxes and as potted plants. It averages 15 inches in height when fully developed. Plants may be set 1 foot apart to make a continuous line. The Liriope has a wide range of adaptability. Plant in Tennessee, South Florida, or anywhere in the South.

It is easy to grow and thrives best in light, enriched soils but persists in hard and heavy soils. Though it blooms anywhere, the foliage is of better dark green when grown in partial shade. Set the plants any time of the year the ground isn't frozen; several years later they may be taken up and divided into at least four times the quantity. Because they bloom in late spring and throughout the summer, the Liriopes are wonderful to use with Daylilies. But Liriope is colorful anywhere it is used!

Bluespire. A new, early and distinctive Liriope. The flower spikes are very erect and stand well above the foliage. The foliage is not quite so wide as Majestic or Lilac Beauty, but the flowering often begins three weeks earlier—here usually the end of May. Our Bluespire, like other Liriopes, is grown strictly from divisions, so is always the same, always uniform. We have built sufficient stock now to offer at a reduced price. 15c each; \$1.50 for 12; \$10.00 per 100.

LIRIOPE, MAJESTIC

Japonica. Low growing with narrow, grass-like leaves. A fine low growing border and rock garden plant. \$1.50 for 12; \$10.00 per 100.

Lilac Beauty. This we consider the finest Liriope to date, and we think we have seen them all. Flower spikes are very straight, erect and uniform, standing well above the wide, dark green foliage. Color is deep lilac-purple; here it blooms all summer. Growth just as vigorous as other Liriopes. 75c each; \$7.00 for 12; \$50.00 per 100.

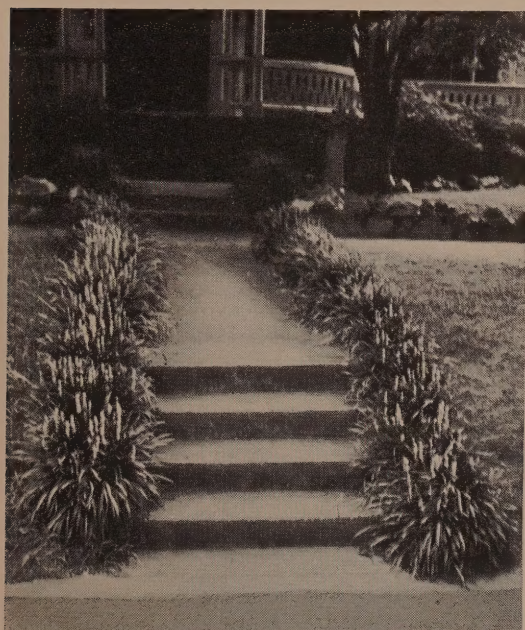

Majestic. A fine Liriope grown in the best gardens at Thomasville for a long time, since being brought here from England and first used at Mill Pond Plantation. The spikes of blue-purple stand erect above the broad, dark green foliage. Many of the flowers are coxcomb in form. Ours are division-grown plants, no seedlings. 20c each; \$2.00 for 12; \$15.00 per 100.

Silvery Sunproof. The best variegated Liriope, and good for planting in shade or sun. Wide, white and green striped leaves and long, deep violet-purple, erect flowers in profusion. 50c each; \$5.00 for 12; \$40.00 per 100.

6 or more plants of any Liriopes at the 12 rate; 40 or more at the 100 rate. We pay transportation; all are delivered prices.

Our Liriopes are vigorous, mostly 1-yr., bed-grown plants or divisions of 2 or more bibs. You will enjoy these lovely Liriopes. Try bordering some Daylily beds with Bluespire or Silvery Sunproof.

In limited supply we have plants of other Liriope.

LIRIOPE, BLUESPIRE bordering walk

HEMEROCALLIS

Daylilies

The growing of top-quality Daylilies has become quite a specialty with us. We won't have all the new Daylilies as fast as they appear—nobody does—but we continually add some of the best, to appear in a new list next spring. In the meantime, many fine ones have come down in price, as shown in this catalog. And nowhere in America are better plants grown than here. We will send you fine plants, grown in sterilized soil, free from any pests, and will ship promptly.

All 50c Daylilies are 12 for \$5.00, 6 or more at 12 rate.

All \$1.00 Daylilies are 12 for \$10.00, 6 or more at 12 rate.

All \$1.50 Daylilies are 12 for \$15.00, 6 or more at 12 rate.

All \$2.00 Daylilies are 12 for \$20.00, 6 or more at 12 rate.

In ordering Daylilies as priced above, you may select as desired. For example, in ordering 12 plants you may select as many as 12 different varieties, or any way you wish in that price group.

All Daylilies priced at \$2.50 or more are Net.

Orders for \$3.50 or more to one address are shipped parcel post prepaid. On orders for less than \$3.50, please add 50c for postage.

Special—If you leave selection to us

From the list of 50c varieties, if you leave the selection to us, we will send plants for 30c each, 12 plants for \$3.00, 50 plants for \$10.00, 100 plants for \$17.50, 1000 plants for \$150.00, delivered.

Please order by color: Red, Purple, Yellow, Orange, Bicolor, Eyed. Also Pinkish, if this color is not more than one-fourth of total order. Orders of \$3.50 or more, no extra charge for postage or packing. Orders of less than \$3.50, please add 50c for postage.

JOIN THE AMERICAN HEMEROCALLIS SOCIETY

Send \$3.50 dues to Mrs. Olive Hindman, Secretary, 404 Weigle Ave., Sebring, Fla.

And the Georgia Hemerocallis Society, dues \$1.00, to Mr. John A. Burch, Jr., Fayetteville, Ga. Keep posted by reading the publications of these active groups.
